MEMORANDUM FOR THE DIRECTOR, CENTRAL INTELLIGENCE AGENCY

Subject: Soviet Atomic Bomb Capabilities

- Enclosures: a. Memo for Col. Joseph Halversen from the Acting Asst. Dir., OSI, CIA, 29 Jun 49
b. Status of the USSR Atomic Energy Project, 1 Jul 49, OSI/SH-10/49
c. Memo to the Asst. Dir., OSI, CIA, from Col. Joseph Halversen, 13 Jun 49
d. Memo to Col. Joseph Halversen from the Rainbow Team. JSPG, 10 Jun 49

1. On the basis of the general discussion at the IAC meeting of 22 July 1949, it is recommended that the Joint Nuclear Energy Intelligence Committee (JNEIC) be directed to revise the estimates in Enclosures a and b so as to amplify and combine them into a single current estimate of Soviet Atomic Bomb Capabilities. In order that the revised estimate may be of greatest use to the Joint Strategic Plans Committee and other agencies of the Joint Chiefs of Staff, it is considered that the table in paragraph 4 of Enclosure a should be expanded to include an estimate of the Earliest Probable Date* by which the Soviets can have a certain number of atomic bombs.

2. It is suggested that on completion the JNEIC draft estimate be presented to the IAC members for consideration and approval, and thereafter furnished to authorized recipients. From the Joint Staff Planners' viewpoint it would be desirable that the estimate be revised periodically, e.g., every six months.

3. In view of the revision of long range intelligence estimates to be undertaken by the Joint Intelligence Committee, it is hoped that an agreed IAC estimate on Soviet Atomic Bomb Capabilities may be available at an early date for inclusion in those estimates.
